

Versatile slip resistant fork covers for a wide variety of loads.

APPLICATIONS

Cascade Magnetic Fork Covers - DAGS are ideal for handling a wide variety of loads. Designed for use in any industrial sector where forks are used to lift products that could be damaged from contact with bare forks. These versatile magnetic covers have been used to protect painted metal, anodized aluminum and wood products. Developed for the painted metal and aluminum industry, DAGS protect surfaces which are subject to scratching or wear, including powdered metal surfaces or anodized aluminum. When confronted with an awkward or slippery load like metal boxes or cages, the forklift driver can install the covers on the forks in a matter of seconds, improving stability and decreasing the chances of the load slipping off the forks.

FEATURES

- Easy to install or remove in seconds without any mechanical or electrical work
- Sticks securely to forks
- 70 durometer (shore A) black rubber upper layer, a metal inner core and a bottom magnetic layer
- Resistant to abrasions, atmospheric agents and oil
- Rib design provides additional coefficient of friction
- Stores within easy reach on any flat surface on the forklift
- Lightweight—does not limit truck rest capacity
- Improves noise reduction
- Can be used with a variety of lifting devices

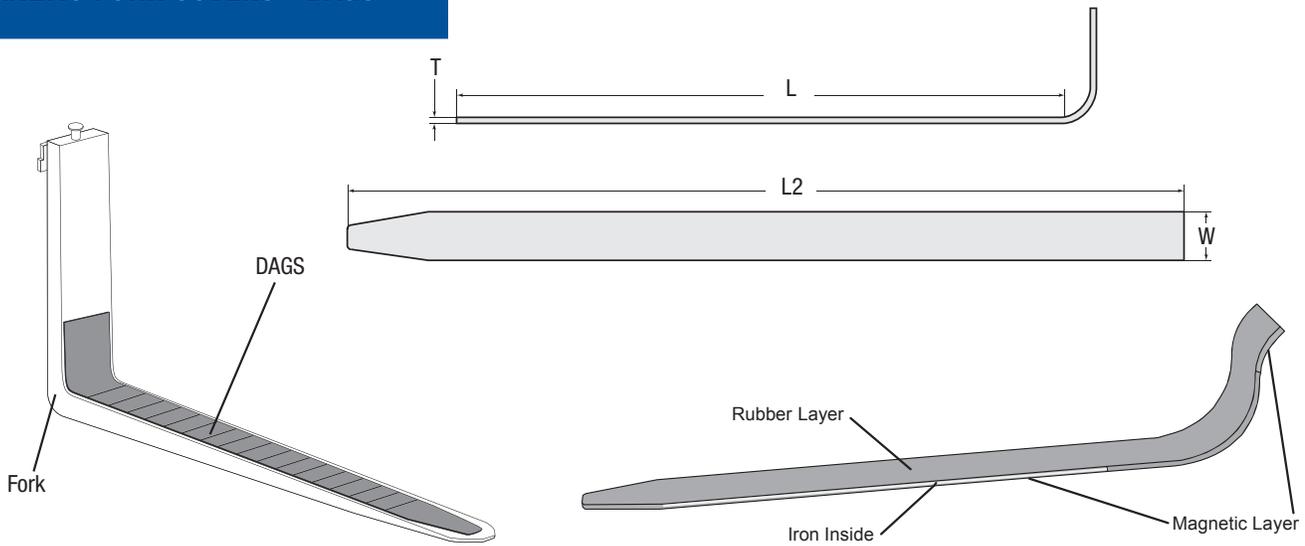

MODELS

- Natural rubber for furniture or food industries
- Many different lengths to accommodate most forks
- Available with fork edge protection
- Special models available for telescopic forks
- Heat resistant, up to 176° F / 80°C (heat resistant, up to 248° F / 120° C on request)

Provides superior protection for handling sensitive materials.

MAGNETIC FORK COVERS - DAGS
